Tutorial 1 – Introduction to Assessment

Introduction to Assessments

Dr. Shengchen Li

14th Mar 2025

Tutorial Session

Assessment in INT104

- 60% Final Exam
  - Paper-based
  - Openbook
  - No Dictionaries
- 40% Coursework
  - Three sections
  - One Report
  - Two Live Demonstration

Final Exam

- 54 Marks MCQ (18 questions)
- 28 Marks Computation Questions (2 questions)
  - Supervised Learning: Naive Bayes, kNN
  - Unsupervised Learning: k-means, Hierarchical Clustering
- 18 Marks Related to Python Programming
  - Fill in the Blank / Correct Bugs

Coursework – Feature Observation

- 15% of module score
- Submit a lab report

- May contain results from all lab sessions
- 6 hours, week 5 + first two hours in week 6
- DDL: Friday in Week 13

Coursework – Unsupervised Learning

- 10% of module score
- Submit a Python script (60 marks, DDL 30th Apr)
  - Three clustering systems to be built
- Live Demonstration (40 marks, lab sessions in week 12)
  - AI allowed with exam safe browser
  - More samples will be added
  - Dataset is different from different groups
  - Implementation duration is awarded with marks
  - Performance is also awarded

Coursework – Supervised Learning

- 15% of module score
- Submit a Python script (50 marks, DDL 9th May)
  - Four classification systems to be built
- Live Demonstration (50 marks, lab sessions in week 13)
  - AI allowed with exam safe browser
  - An extra feature will be added to form a new dataset
  - The feature added is different from different groups
  - Implementation duration is awarded with marks
  - Performance is also awarded

Lecture / Lab / Tutorial Arrangements

- Tutorial in week 7 is cancelled
- Lab in week 11 is almost cancelled (80% sessions are cancelled)
- Lecture in week 11 is cancelled

📌 Timetabling team cannot find a time slot as an alternative

- So affected teaching activities must be cancelled

New Teaching Plan

Planned

- Week 4
  - Lecture: Data Features & PCA
  - Tutorial: Introduction to Coursework 1
- Week 5
  - Lecture: Unsupervised Learning I
  - Lab: Coursework 1
- Week 6
  - Lecture: Unsupervised Learning II
  - Lab: Coursework 1
- Week 7
  - No Lectures
  - Tutorial: Feedback CW1 & Intro to CW2
- Week 8
  - Lecture: Supervised Leanring I
  - Lab: Coursework 2
- Week 9
  - Lecture: Supervised Learning II
  - Lab: Coureswork 2 (Live Demonstration)
- Week 10
  - Lecture: Fine–tune & System Evaluation
  - Tutorial: Feedback CW2 & Intro to CW3
- Week 11

Now

- Week 4
  - Lecture: Data Features & PCA
  - Tutorial: Introduction to Assessments
- Week 5
  - Lecture: Unsupervised Learning I
  - Lab: CW1
- Week 6
  - Lecture: Unsupervised Learning II
  - Lab: CW1 (2 hrs) + CW 2 (2 hrs)
- Week 7
  - Lecture: Supervised Learning I
  - No Tutorials
- Week 8
  - Lecture: Supervised Learning II
  - Lab: CW2
- Week 9
  - Lecture: Fine–tune & System Evaluation
  - Lab: CW3
- Week 10
  - Lecture: Applications of AI
  - Tutorial: Feedback of all CWs
- Week 11
  - No Lectures
  - Lab Q&A on Monday

- Lecture: Applications of AI
- Lab: Coursework 3

- Week 12
  - Lecture: AI Ethics & Future AI Dev.
  - Lab: Coursework 3 (Live Demonstration)
- Week 13
  - Lecture: Feedback CW3 & Review
  - No Lab/Tutorial

- Week 12
  - Lecture: AI Ethics & Future AI Dev.
  - Lab: Coursework 2 (Live Demonstration)
- Week 13
  - Lecture: Review
  - Lab: Coureswork 3 (Live Demonstration)
